KO MANUFACTURING INC.

TAR REMOVER

PRODUCT NUMBER 235

RESEARCH

Through R&D and field testing, KO Chemists combine creativity with technology to bring you products with the performance you require. Using our sophisticated KO lab we continually test new products, existing products, and our manufacturing processes for effectiveness and affordability.

When a new product meets our requirements, it goes to a select group of end-users for real-world evaluation. Only after testing, evaluating, and re-testing is a KO product ready for distribution. We invite you to come and be a part of a winning solution.

Attention: Refer to our Material Safety Data Sheet regarding hazards, personal protection, and disposal of this product.

Techsheet Modified on 4/5/2004

PRODUCT DESCRIPTION:

235 is a petroleum solvent based product that was formulated for removing tar and asphalt for tank wagons. It's unique blend of solvents and wetting agents penetrate and loosen those tough to get soils. When used in combination with a high pressure rinse, it is an effective and economical way of solving the demanding task of cleaning tank wagons.

INSTRUCTIONS:

235 was formulated to clean tar and asphalt from tank wagons that haul the materials, but it may be used for other cleaning applications that require the removal of this type of substance.

For Cleaning Tank Wagons: Apply 235 as is or diluted 1:1 with diesel fuel. (A pump-up sprayer may be used for this application.) Allow to remain on surface for 1 to 2 minutes. Come back with a high pressure hot water rinse. A second application may be required for heavy build-ups.

* 235 may be incompatible with some painted surfaces. Test on a small inconspicuous area before using on entire surface.

CUSTOMER BENEFITS:

Easy to use.
Economical to use.
Effectively penetrates and loosens tar and asphalt.
Greatly reduces cleaning time.
