KO MANUFACTURING INC.

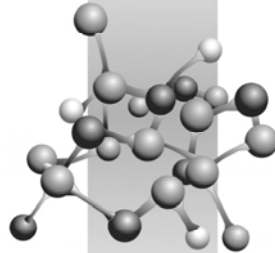

CAST-AWAY™

PRODUCT NUMBER 250

RESEARCH

Through R&D and field testing, KO Chemists combine creativity with technology to bring you products with the performance you require. Using our sophisticated KO lab we continually test new products, existing products, and our manufacturing processes for effectiveness and affordability. When a new product meets our requirements, it goes to a select group of end-users for real-world evaluation. Only after testing, evaluating, and re-testing is a KO product ready for distribution. We invite you to come and be a part of a winning solution.

Attention: Refer to our Material Safety Data Sheet regarding hazards, personal protection, and disposal of this product.

Techsheet Modified on 6/12/2006

PRODUCT DESCRIPTION:

Cast-Away™ is a heavy duty, super concentrated, industrial liquid detergent designed for heavy duty cleaning in conveyor and basket spray cabinets. Its tough action removes heavy grease, rust, and some paints from steel or cast iron surfaces. This special low-foaming formula provides superior cleaning at low or high temperatures (temperature must be above 102 degrees F) while extra-additives help prevent rust. Cast-Away™ can also be used in large industrial vats that require heavy-duty cleaning with little foaming at lower temperatures. It is excellent for hard water cleaning, conforms to USDA guidelines, is compatible with reclaim systems, and is biodegradable.

PRODUCT INSTRUCTIONS:

Industrial Spray Cabinet Machines:
Set alkalinity meter to dispense Cast-Away™ between a 2% to 5% solution, depending on soil. Run cleaning cycle for 5 to 30 minutes (depending on machine, type of soil, and amount of soil) at temperatures above 102 degrees F (higher temperatures will yield better results).

Suggested dilutions only. Use as a starting point. Adjust accordingly for best results.

KEY POINTS:

- Easy to use.
- De-foaming.
- Super concentrated formula for long lasting use.
- Contains corrosion inhibitors.
- Removes heavy grease, rust, and some paints.
- Economically priced per wash cycle.
- Conforms to USDA guidelines.
