RUST PREVENT

PRODUCT NUMBER 290

RESEARCH

Through R&D and field testing, KO Chemists combine creativity with technology to bring you products with the performance you require. Using our sophisticated KO lab we continually test new products, existing products, and our manufacturing processes for effectiveness and affordability. When a new product meets our requirements, it goes to a select group of end-users for real-world evaluation. Only after testing, evaluating, and re-testing is a KO product ready for distribution. We invite you to come and be a part of a winning solution.

PRODUCT DESCRIPTION:

Rust Prevent is a superb rust prevent formula. This non-nitrite formula is designed to leave a protective coating on metals. It also provides long lasting protection from corrosion causing elements. Rust Prevent is designed for a wide variety of applications. It's combination of chemicals prevent rust on all ferrous materials.
