PRODUCT NUMBER 9151

RESEARCH

Through R&D and field testing, KO Chemists combine creativity with technology to bring you products with the performance you require. Using our sophisticated KO lab we continually test new products, existing products, and our manufacturing processes for effectiveness and affordability. When a new product meets our requirements, it goes to a select group of end-users for real-world evaluation. Only after testing, evaluating, and re-testing is a KO product ready for distribution. We invite you to come and be a part of a winning solution.

PRODUCT DESCRIPTION:

A high foaming, low pH preosak designed for two-step cleaning systems. This concentrated formula does not contain poisonous hydrofluoric acid or ammonium bifluoride, yet is aggressive towards dirt and road film. Special lubricants make this product ideal for friction washes, yet it is still versatile enough for touchless systems.

INSTRUCTIONS:

For presoaking, mix 1 part chemical with 64 parts water. Apply to surface. Rinse well.

For best results, use hot water.

Suggested dilutions only. Use as a starting point. Adjust accordingly for best results.

CUSTOMER BENEFITS:

- Economical.
- High foaming.
- Non-poisonous formula.
- Great at brightening chrome and windshields.
- Concentrated.

Attention: Refer to our Material Safety Data Sheet regarding hazards, personal protection, and disposal of this product.
