

Work Smarter Not Harder

Pressure Washers are viewed as a necessary tool in most businesses such as car dealerships, mechanics shops, detail centers, construction companies, and heavy equipment dealers just to name a few. As with most tools, there are many accessories available that pay for themselves quickly in the form of reduced labor.

Pressure Services stocks more accessories than ever before. One accessory we stock is high pressure surface spinners. We offer an 18-inch economy model, and a 30-inch industrial model. Surface spinners are to pressure washers, what lawn mowers are to cutting grass. If you were to use your weed whip to mow your lawn, you would end up with very uneven lengths of grass with no uniform appearance.

The same principle applies when using a high pressure wand. As you walk along moving the spray pattern back and forth you get very inconsistent cleaning. Instead of a mower blade delivering a uniform cut at a set height, you have a high pressure wand spinning in a circular pattern which cuts cleaning time up to 66%, reduces operator fatigue, and provides consistent cleaning. Besides being 66% faster, additional labor is avoided by the spray being contained beneath a shroud eliminating unnecessary clean up of windows and walls from overspray.

Season Special!

18 inch Surface Spinner
Rated up to 4000 psi @ 8 gpm
