

Work Smarter Not Harder Part II

In the last Pressure Washer E-blast we expanded on the use of Surface Spinners to cut labor time. I want to elaborate a little more on the importance of taking the right tool for the right job. High Pressure Water Brooms are a far less expensive alternative to surface spinners. We offer a 12 inch wide 3 nozzle model and a 16 inch wide 4 nozzle model both of which conveniently quick-couple on to the pressure washer wand.

These cut labor time drastically by allowing you to walk behind the water broom as it flushes and moves debris out ahead of you. When compared to an operator washing with a single nozzle wand in a brush stroke pattern, there is no comparison.

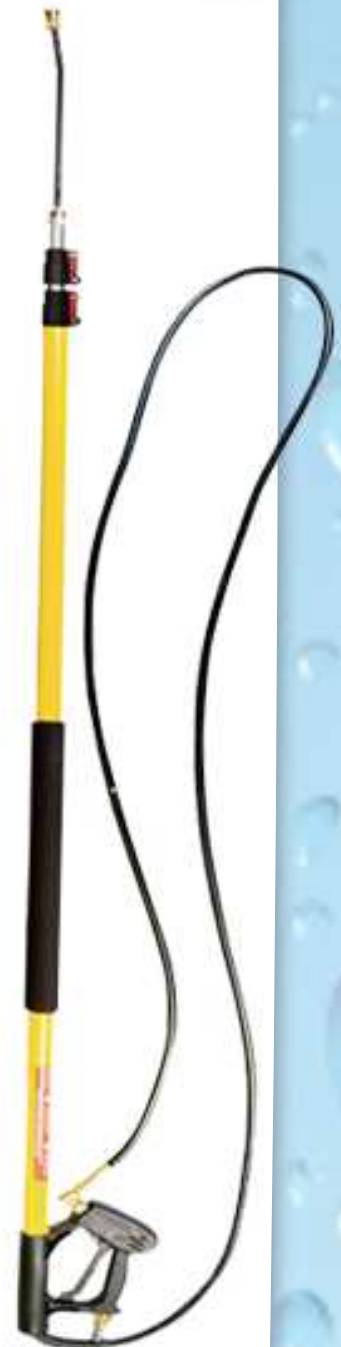

- **12 Inch Water Broom Part# 85.400-060 List Price \$41.75 Sale \$33.50**
- **16 Inch Water Broom Part# 85.400-061 List Price \$46.25 Sale \$37.00**

Another huge time saver is the 16 foot high pressure telescoping wand when combined with the long wand belt kit which supports the telescoping high pressure wand and reduces operator fatigue.

Not only does this save labor time when compared to getting up and down off of a ladder or scaffolding, but it improves safety by allowing the operator to stay on the ground with feet firmly planted.

The other benefit is that the operator keeps a reasonable distance from what they are cleaning which minimizes back splatter and getting drenched. If you are cleaning leaves or pine needles out of your rain gutters, simply add a Gutter Cleaner Attachment. It quick-couples on to the telescoping wand and makes everything easier – now you have the right tool for the job!

- **16 ft. Telescoping Wand Part# 85.206.018L List \$129.99 Sale \$104.00**
- **Long Wand Belt Kit Part# 85.400.019 List \$14.50 Sale \$11.60**
- **Gutter Cleaner Attachment Part# 85.400.033 BEP List \$10.50 Sale \$8.50**
