KO MANUFACTURING INC.

D-SCALE™

PRODUCT NUMBER 5620

RESEARCH

Through R&D and field testing, KO Chemists combine creativity with technology to bring you products with the performance you require. Using our sophisticated KO lab we continually test new products, existing products, and our manufacturing processes for effectiveness and affordability. When a new product meets our requirements, it goes to a select group of end-users for real-world evaluation. Only after testing, evaluating, and re-testing is a KO product ready for distribution. We invite you to come and be a part of a winning solution.

PRODUCT DESCRIPTION:

D-scale is a liquid acid concentrate that is designed to effectively and easily remove lime, iron, and scale from surfaces with little effort. This formula lifts mineral deposits and soils on washable fabrics and is ideal for removing hard water buildup in industrial dish machines. This special USDA approved, low-odor formula is more user-friendly than other scale removers and is biodegradable.

INSTRUCTIONS:

De-Liming: Dilute 1 part D-Scale with 4 parts hot water (140F) for heavy scale removal. Allow product to sit for 5 to 10 minutes. Rinse well with fresh water.

Suggested dilutions only. Use as a starting point. Adjust accordingly for best results.

CUSTOMER BENEFITS:

- Easy to use.
- Removes scale with minimal effort.
- USDA approved.
- Low-Odor formula.
- Usable on fabrics and nearly all types of metal.

Attention: Refer to our Material Safety Data Sheet regarding hazards, personal protection, and disposal of this product.
