

# High Efficiency Stationary NG/LP Fired Pressure Washer

- Operates at 98% efficiency
- 38% fuel savings on average
- Reduces maintenance costs
- Lowers ventilation costs (CPVC)
- Reduces negative environmental impact

The 73-Series utilizes dual heat chambers, dual pump systems and has two independent sets of controls. Each control set operates a pump via a clutch-drive. This unit provides the benefits of two totally independent pressure washers driven off a single motor and on one chassis. It is ideal for true independent two gun operation. With a long list of exclusive features, the 73-Series is sure to exceed your particular needs.

### FEATURES (not shown on breakout);

- ETL Listed
- Watertight Electrical Panel
- · Laminate High Visibility Control Panel Overlay
- Two Gun Operation w/Dual Outlets & Controls
- Diagnostic Control Monitoring Lights (x2)
- Hour Meter w/Break-In & Oil Change Alerts
- Automatic Shutdown Timer
- Dual Combustion Chambers
- ASTM A53 Schedule 80 Steel Heating Coil
- Electronic Ignition

- Dual Pressure Relief Valves
- Exclusive Low Pressure Manifold Plumbing
- JIC Fittings Assuring Leak Free Connections
- Soap Solenoid
- Trigger Gun Controls
- Wire Braid Discharge Hoses
- Ouick Couple Stainless (x2) Steel Nozzles
