

# WHY CHOOSE THE AaLADIN 2000-SERIES?

Wash parts cleaner & faster with AaLadin's 360° spray flow and 0° jets!

## AaLadin Parts Washer Technology:

Solvent tanks and washers have been used for years to clean parts, these solvent systems are known health hazards and consume a great deal of labor. They are also expensive to operate as petroleum products increase in price and environmental regulation adds cost. **AALADIN HAS A SOLUTION!** Clean parts in minutes with hot water and bio-degradable detergents, NOT solvents. Simply place your parts in the washer, set the timer and walk away. It's automatic. Work on something else. In minutes, your parts are clean. **It's that simple.**

### SEAL-LESS "EZ-LOAD" DOOR

Water drains back into the machine keeping your floor dry and resulting in less exposure to slipping and injury. 50% of the turntable is exposed so it is much easier to load and unload than a flat door washer. You DO NOT have to put your head and arms into a box of hot steam and dripping water to load and unload the parts washer.

### LARGER LOAD HEIGHTS WITH BUILT-IN HEAD RACKS

Easily wash the most awkward and tall loads

### STANDARD AUTOMATIC OIL SKIMMING SYSTEM

Prolongs the life of the detergent and results in much cleaner parts.

## Don't pay expensive labor to wash parts:

The AaLadin parts washer cleans better than a brush and solvents. Since your parts have been washed with hot water, and not oil based cleaners, most parts will air-dry and be ready to use within minutes.

## Dry floor evaporator with power vent:

Dirty wash water is contaminated with oil, paint and other heavy metal pollutants. Our original design features a built-in **NOTHING DOWN THE DRAIN** disposal system. Flip a switch and dispose of **97%** of the waste water from your washer. You can also use its disposal system to dispose of dirty wash water from other parts washing machines. Our self-contained parts washer evaporates water to eliminate hauling waste water. This limits environmental liability. Models: 2040E, 2055E, 2085E, 2175E, 2260E are built standard with the **Dry Floor Waste Water Disposal System & Power Vent.**

## Belt-driven turntable:

All turntable drive parts are on the outside of the cabinet to protect from grime and wear, this prevents damage from load jams.

## 2 year warranty:

Turntable & oil skimmer motors.

## Life time warranty:

Internal turntable bearing.

## Pumps & wear points:

Constructed for durability.

Notes:

# A CLOSER LOOK AT THE FEATURES...

## Features (not shown above):

- Quick Service Fine Screen Filter
- ETL & C-ETL Listed
- Conforms to UL STD. 73
- Certified to: CAN/CSA STD. C22.2 NO. 68

- Small Parts Soaking System (2085E/2175E/2260E)
- Dual Zone Quick Service Filters w/Slide Out Fine Debris Screen & Small Debris Catch Basket (2085E/2175E/2260E)

## YOUR TEAM AaLADIN ELITE DISTRIBUTOR

AaLadin is all about partnerships - partnerships with our distributors as well as partnerships with our customers. We understand that your utmost satisfaction is what will keep AaLadin strong for the future. A big part of that level of satisfaction is the relationship forged between you and your AaLadin distributor.

That's why we take such great care in teaming up with the best distributors in the industry. When you purchase an AaLadin product, you become part of Team AaLadin and can expect the best in service and support. Your distributor is ALWAYS ready to help in any way needed. Be a part, join Team AaLadin today.
