

# BLAST OFF

Acidic Presoak

## DESCRIPTION

Blast Off is a highly concentrated low pH presoak used as part of the "two-step" cleaning process. It is a hyper version of Lift Off that provides the same great cleaning, but in a more cost-effective concentrate.

Blast Off contains no HF or ABF, instead it utilizes other acids to effectively remove tough road films.

What are you waiting for, are you ready to Blast Off?

## USAGE INSTRUCTIONS

Blast Off can be applied as a first or second step in a two-step cleaning process. For use in touch free as a first step, start application at 300-450:1 (8-12 drops). For use as a second step, start application at 160-200:1 (18-22 drops). For more difficult cleaning conditions slowly increase strength.

## FEATURES

- Highly Concentrated
- Contains no HF or ABF
- Increased shine to metal and glass
- Great at removing tough road films

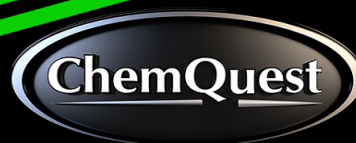

## SIZES AVAILABLE

Twin Packs                      Code: 10-10121-888  
55-gallon drums              Code: 10-10121-055
