

Premier manufactures custom drying equipment for many industries all over the world. Many hours and years of experience studying air flow and air distribution have made our dryers number one on the market.

At Premier, our customers are our partners. We provide our customers with individualized solutions to maximize functionality for the perfect dryer system set up. Not only does Premier provide great products and service, we also lead in price, custom design, private labeling and dryer performance. Our positive and knowledgeable staff are ready and available to make your venture a profitable and enjoyable experience.
