KO MANUFACTURING INC.

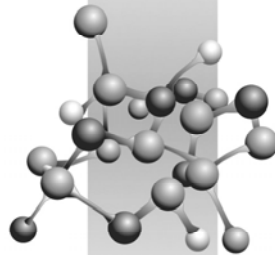

COLD MIX RELEASE AGENT

PRODUCT NUMBER 4013

RESEARCH

Through R&D and field testing, KO Chemists combine creativity with technology to bring you products with the performance you require. Using our sophisticated KO lab we continually test new products, existing products, and our manufacturing processes for effectiveness and affordability. When a new product meets our requirements, it goes to a select group of end-users for real-world evaluation. Only after testing, evaluating, and re-testing is a KO product ready for distribution. We invite you to come and be a part of a winning solution.

PRODUCT DESCRIPTION:

KO Manufacturing's Cold Mix Release Agent is a special blend designed specifically for machines that pour cold mix asphalt. By creating a temporary, non-stick, protective surface between the asphalt and the machine applying the asphalt, applications are quicker and build-up of cold mix asphalt is prevented. Safe for humans, biodegradable, and non-interfering with the asphalt, KO Manufacturing's Cold Mix Release Agent is an excellent way to shorten pour times, increase the life of your machinery, and protect your employees from other release agents that are toxic.

INSTRUCTIONS:

Mist product as-is on cold mix asphalt dispensing equipment. Re-apply as necessary.

CUSTOMER BENEFITS:

- Greater lubricity than most natural oils.
- Greater durability than most natural oils.
- Effective at reducing asphalt buildup on machinery.
- Non-toxic and biodegradable.
- Does not interfere with asphalt.

Attention: Refer to our Material Safety Data Sheet regarding hazards, personal protection, and disposal of this product.
