KO MANUFACTURING INC.

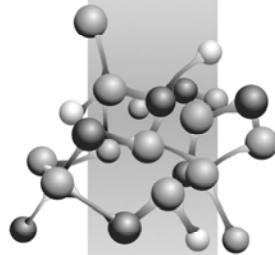

CONCRETE AND SCALE REMOVER

PRODUCT NUMBER 118

RESEARCH

Through R&D and field testing, KO Chemists combine creativity with technology to bring you products with the performance you require. Using our sophisticated KO lab we continually test new products, existing products, and our manufacturing processes for effectiveness and affordability. When a new product meets our requirements, it goes to a select group of end-users for real-world evaluation. Only after testing, evaluating, and re-testing is a KO product ready for distribution. We invite you to come and be a part of a winning solution.

Attention: Refer to our Material Safety Data Sheet regarding hazards, personal protection, and disposal of this product.

Techsheat Modified on 12/16/2002

PRODUCT DESCRIPTION:

Concrete and Scale Remover is a fast acting cleaner designed for concrete, scale, and oxide film removal. This concentrated solution is effective at removing hardened concrete and scale, yet will not harm painted surfaces when used properly. Concrete and Scale Remover is also exceptional at removing scale build-up commonly found on fiberglass boat surfaces, leaving a crisp, clean finish.

INSTRUCTIONS:

For scale and oxide build-ups, dilute 1 part Concrete and Scale Remover with 10 parts water. For heavy scale or concrete, use concentrated. Apply using a chemically inert pump-up sprayer directly on surface. Let sit for 3-5 minutes and rinse with fresh, cold water at high pressure to loosen and break scale. Repeat if necessary.

Suggested dilutions only. Use as a starting point. Adjust accordingly for best results.

CUSTOMER BENEFITS:

- Removes concrete and scale quickly.
- Will not harm paint.
- Excellent for scale removal on fiberglass boats.
- Biodegradable.
- Concentrated for best value.
