KO MANUFACTURING INC.

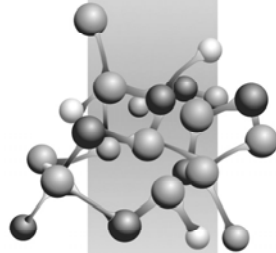

POLYMERIC RELEASE AGENT

PRODUCT NUMBER 4014

RESEARCH

Through R&D and field testing, KO Chemists combine creativity with technology to bring you products with the performance you require. Using our sophisticated KO lab we continually test new products, existing products, and our manufacturing processes for effectiveness and affordability. When a new product meets our requirements, it goes to a select group of end-users for real-world evaluation. Only after testing, evaluating, and re-testing is a KO product ready for distribution. We invite you to come and be a part of a winning solution.

Attention: Refer to our Material Safety Data Sheet regarding hazards, personal protection, and disposal of this product.

Techsheet Modified on 2/8/2006

PRODUCT DESCRIPTION:

KO Manufacturing's Polymeric Release Agent is a special blend designed specifically for equipment used with hot asphalt. By creating a temporary, non-stick, protective surface, applications are quicker and build-up of asphalt is prevented. Polymeric Release Agent has superb release capability with most types of performance grade binders and is ideal for Superpave designed asphalt. Safe for humans, biodegradable, and non-interfering with the asphalt, KO Manufacturing's Polymeric Release Agent is an excellent way to shorten pour times, increase the life of your machinery, and protect your employees from other release agents that are toxic.

PRODUCT INSTRUCTIONS:

Polymeric Release Agent may be used undiluted up to 64:1 with water, depending on the asphalt design.

Results may vary with temperature, the surface in contact with the asphalt, the frequency in which the release agent is used, and the asphalt binder used.

KEY POINTS:

- Biodegradable
- Certified
- Ideal for Superpave Designed Asphalts
- Long Lasting
- Non-Interfering
- Concentrated
