KO MANUFACTURING INC.

RECLAIM-IT™ HD

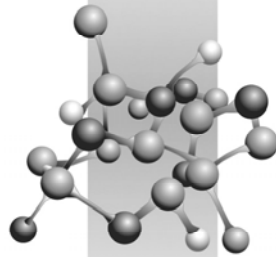

PRODUCT NUMBER 215

RESEARCH

Through R&D and field testing, KO Chemists combine creativity with technology to bring you products with the performance you require. Using our sophisticated KO lab we continually test new products, existing products, and our manufacturing processes for effectiveness and affordability.

When a new product meets our requirements, it goes to a select group of end-users for real-world evaluation. Only after testing, evaluating, and re-testing is a KO product ready for distribution. We invite you to come and be a part of a winning solution.

Attention: Refer to our Material Safety Data Sheet regarding hazards, personal protection, and disposal of this product.

Techsheat Modified on 10/27/2004

PRODUCT DESCRIPTION:

Reclaim-It HD is a non-emulsifying cleaner designed specifically for industrial wash systems that use water reclaim systems. Its "quick release" technology allows it to remove heavy oil and grease and release it quickly so that it can be processed easily in a water/oil separating system. Reclaim-It HD has higher surfactant concentration and pH making it a great choice for road film and grime removal for fleet vehicles and semis.

INSTRUCTIONS:

Dilute 2 ounces of Reclaim-It HD for every gallon of water (64:1). Apply at low pressure using hot water (160F) starting from the bottom and working upwards. Do not apply to polished aluminum! Rinse thoroughly with high pressure starting from the top and working down.

Suggested dilutions only. Concentrations may vary with time of year, equipment, and type of soil. Use as a starting point.

CUSTOMER BENEFITS:

- Biodegradable
- Non-emulsifying
- Excellent rinsing ability
- Great at cutting oil and grime
- Nonflammable
