

The Car Wash Starts Here.

Sentinel®

The *Sentinel* is an innovative, internet-enabled kiosk that simplifies the transaction experience for car wash customers. Known as one of Unitec's most innovative products, the *Sentinel* is designed to work with any in-bay automatic or conveyor wash system and is perfect for busy sites that must effectively manage higher customer volumes.

Customer Convenience

The Sentinel features a large, 15-inch touch screen that is easy to reach. The user-friendly features of this product, including the ability to view wash options and pricing on a single screen, make the transaction process quick and easy.

Flexibility

Dual bill dispensing capabilities are available, in addition to up to three coin dispensing hoppers. Voice messaging is standard, with options and support offered for dual languages (English and Spanish). Up to eight different wash packages may be offered. The Sentinel may also be used in Canada.

Marketing Options

Customizable promotions, advertisements and VIP Wash Coupons are standard marketing components. An enhanced marketing package is available, offering 100,000+ house accounts, VIP Wash Pass Cards and multi-site gift cards. Branding opportunities are enhanced through the Sentinel's customizable graphics panels and post-sale video advertising capabilities.

Efficiency

The Sentinel is a smart choice for sites expecting high volume traffic. When combined with the ReachFree ID system, the Sentinel can create a more efficient throughput process, increasing traffic volumes and bottom line revenues for the site owner. Remote access tools allow the site owner to monitor activity, generate reports and schedule promotions through the internet.

Security

Cash is stored in a separately-keyed cassette that can be pre-loaded and unloaded in a private setting. A high security lock system as well as an integrated alarm assure the safety and security of assets. The Sentinel can also be outfitted with an optional wide-angle surveillance camera.

A Story From ...

**Mel Ulrich, Owner of The Washhouse
Graham, Texas, and Mineral Wells, Texas**

"I conducted a good deal of research before purchasing the Sentinel for my business and I can honestly say **I haven't seen a better product out there.**

Originally, I was really impressed with the sleek design, the large touch screen and the simplicity of the system. Over time, I have realized another great benefit is the change dispensing system; instead of giving customers a dozen quarters back as change, the Sentinel provides bills. The immediacy of the credit card reader in processing payments is another great feature that has kept my customers happy.

By investing in the Sentinel, I have secured a high quality and a great looking system with all the bells and whistles. But most importantly, **it has increased and improved customer throughput, and led to higher customer satisfaction.** It's very beneficial to my business. The revenue I'm generating with the Sentinel has given us a very positive return on our investment.

We've implemented a number of customer loyalty programs using the Sentinel including VIP coupons and fleet accounts. We work with a nearby gas station to offer their customers \$1 off a car wash with any purchase. This program has really worked great. In fact, **it's increased my revenue by about 10 percent!**

I've worked with Unitec for a long time and have purchased other equipment the company manufactures. They are a great partner, with a solid reputation and a top-of-the-line product offering."
