

**YOUR BUSINESS AT
YOUR FINGERTIPS.
ANYWHERE.
ANYTIME.**

HAMILTON HOSTED SOLUTIONS

***Hamilton Hosted Solutions* is a comprehensive reporting and management platform designed to provide you with resources to successfully control the back-end of your business.**

BUSINESS DASHBOARD

DATA STORAGE

RFID ADMINISTRATION

Hosted Solutions works in conjunction with our Data Access Network (D.A.N.), providing secure, cloud-based storage for individual or multiple locations. With real-time reporting, you can quickly identify trends and develop strategies to respond to the demands of your market.

It also supports the administration of our *ExpressPass* RFID system, allowing you to manage the all key components of your business from one convenient resource.

BUSINESS DASHBOARD

The customizable business dashboard in *Hosted Solutions* provides real-time transaction data from your location(s) to help you gauge site activity.

You determine which reports and information are most important to you, creating a dashboard relevant to your business model.

Information such as total revenue, equipment status, daily item counts, sales by hour, and today's sales by item is available.

Customized reporting allows you to track activity from individual Gold Line's®, HTK's, D.A.N. Transaction Terminal's (DTT's), vacuums, and change machines.

DATA STORAGE

Hosted Solutions gives you peace of mind by providing cloud-based storage for your Data Access Network(s).

In the event of a catastrophic error when a D.A.N. requires complete replacement, all of your historical data is still accessible through *Hosted Solutions*.

Regardless of circumstances, you'll never miss a transaction.

EXPRESSPASS RFID ADMINISTRATION

Our *ExpressPass* RFID system is administered in *Hosted Solutions*. Profiles are created and managed through an easy interface for one of three pass types:

Prepaid: the customer is charged a recurring monthly/yearly fee for unlimited washes or a predetermined number of washes

Postpaid: the number of washes used in a billing cycle is tracked in *Hosted Solutions*. The customer is then billed. This can be used for commercial fleet accounts or consumer accounts

Pay-As-You-Go: the customer's credit card is charged each time the pass is used, with the transaction record posted to *Hosted Solutions*. The wash and the price are determined at the time the customer signs up for the pass

ADDITIONAL FEATURES

Billing

Automated billing is run nightly, and there is also an option for manual billing

Custom program names

Personalize loyalty programs to align with your branding. Custom names will appear on your customers receipts

Limits

Limits can be placed on the number of times a pass is used

Reports

Hosted Solutions can generate the following reports:

- member activity
- invoices
- transaction records
