

A-SALT

Acidic Presoak

DESCRIPTION

Tired of losing the rust battle to road salt and other de-icing materials? Then fight back with this product. This product is specially formulated to treat and remove heavy road salt deposits while leaving behind a protective anti-rust barrier. Simply apply as an undercarriage application, low pH presoak or standalone metal cleaner. Either way you'll stop rust in its tracks and your customers will thank you.

USAGE INSTRUCTIONS

This product should be applied under low pressure with soft water. When applying it as a low pH presoak, apply it as the first step to the entire vehicle. Begin by applying at 75-125:1 (6-10 drops). For heavier salt deposits increase strength as needed. When applying as an undercarriage application begin applying at 125-200:1 (4-6 drops). For metal cleaning or industrial equipment cleaning please contact your sales representative.

FEATURES

- Removes salt corrosion
- Safe on glass, metal and painted surfaces
- Creates temporary anti-rust barrier
- Flexible application
