

DEFOAMER

Concentrated Foam Suppressant

DESCRIPTION

Is it a constant struggle to eliminate foam in pits or wash bay? If so, have you tried this product? It is highly concentrated, so a little goes a long way. This formula is reclaim compatible and can be used at new startups and installations. Simply apply to foam buildup and watch the problems collapse away. Defoamer will continue to work beyond initial application.

USAGE INSTRUCTIONS

Easiest way to apply is at point of foam buildup. Simply pour a small amount, around 5-10oz or less, to the foam. Allow product to eliminate foam before adding more. A dosing pump can be used, but must be on lowest setting (no more than a couple ounces in 24 hours). Always error on lesser side and add too little product.

FEATURES

- Minimal usage required
- Reclaim safe
- Concentrated
- Effective after application
