

EVOLUTION

Alkaline Presoak

DESCRIPTION

A truly versatile alkaline presoak, this product is a great choice when you want to be safe. Nicely buffered, it protects soft metals like brass and aluminum, while removing heavy road films from glass and paint. This product can be used in both one and two step touch free carwashes. Additionally, it works great for degreasing heavy equipment and because it is buffered it is ideal for semi-trucks.

USAGE INSTRUCTIONS

This product should be applied under low pressure and ideally with soft water. For touch free applications begin at 25-40:1 (10-16 drops) and adjust as necessary. For friction applications begin at 40-70:1 (6-10 drops). When using it as a degreaser dilute to at least 20:1 and apply it to a small portion of the vehicle/equipment. Monitor results and adjust if necessary. For use in cleaning heavy duty equipment and semi-trucks consult your sales representative.

FEATURES

- Aluminum safe
- Creates shiny paint and glass
- Safe on wheels and tires
- Reclaim compatible

SIZES AVAILABLE

5-gallon pails Code: 11-1245L-005
15-gallon drums Code: 11-1245L-015
30-gallon drums Code: 11-1245L-030
55-gallon drums Code: 11-1245L-055
