

# HSR-10.01

Bay Cleaner

## DESCRIPTION

This product is a non-corrosive low pH equipment and bay cleaner. Its low foaming profile helps deliver maximum acidity for cleaning with minimal surfactant interference. This product is extremely effective on equipment and concrete at removing rust stains and hard water buildup. It provides plenty of cleaning power, while still being non-corrosive.

## USAGE INSTRUCTIONS

For maximum effectiveness apply directly to dry equipment, bay walls and floor. Begin application at a dilution of 5-10:1. For more difficult conditions use straight up to 5:1. Allow solution to sit for a minute before scrubbing or rinsing. Rinsing with high pressure will further improved the effectiveness of the application.

## FEATURES

- Low foaming
- Non-corrosive
- Effective on rust and concrete
- HF and ABF free

## SIZES AVAILABLE

5-gallon pails	Code: 10-70007-005
15-gallon drums	Code: 10-70007-015
30-gallon drums	Code: 10-70007-030
55-gallon drums	Code: 10-70007-055
